

OPEN JOURNAL SYSTEMS

Open Journal Systems (OJS) is a system for managing and publishing digital journals. It provides support for all the steps involved in creating a journal (submission, peer review, reviewers' feedback, etc.). With OJS you can also start a new journal. This service is free of charge.

- ✓ Publish **journals** immediately in open access (often without a publisher)
- 🌐 www.open-access.uni-bonn.de/en/recommendations/open-access-journal

Did you know that ...
the USL Bonn supports you in moving or starting your journal?

- publication process and platform **in the hands of the scientific community**
- mostly **no fees** for articles contributed by authors
- Server and hosting of OJS journals **free of charge** for members of the University of Bonn

SCENARIOS

Setting up a new periodical

Have an idea for a new open-access periodical and seeking a suitable environment for it? We can help you get established and advise you on what you need to bear in mind.

"Moving" your periodical

If you already publish a periodical and would like to make it open-access in the future, we can help you migrate your periodical to a new (digital) environment.

Optimizing your workflow

If open access is not an option for your periodical but you would still like to optimize its workflow, digital management can do that for you too.
